

Fire Fighters must be equipped to handle any situation that may arise in their day to day roles. Outdated, nonfunctional, or missing equipment can mean the difference between life and death for both public safety employees and civilians. Facilitating the accurate tracking and maintenance of equipment issued is paramount to safety.

QUICK® Personnel Equipment Issues and Fire Resource Activities is a mobile extension of the SunGard Public Safety Fire personnel equipment issue and Fire Resource Activities functionality.

QUICK® Equip. Issues/Fire Resource benefits

- Wireless freedom & flexibility
 - ◆ Work in the office over a wireless local area network (WLAN)
 - ◆ Work on the road over a wireless wide area network (WWAN)
- Online real-time access to SunGard applications
- Drop down lists linked to SunGard maintained data tables for all value selections
- Ability to print bar coded labels for equipment
- Increased accuracy via bar code scanning
- Reduction in errors
- Elimination of paperwork
- Elimination of information redundancy
 - ◆ Manually record equipment issues
 - ◆ Enter data into personnel equipment issues at a later time
- Fire Personnel Equipment Issues
- Fire Resource Activities

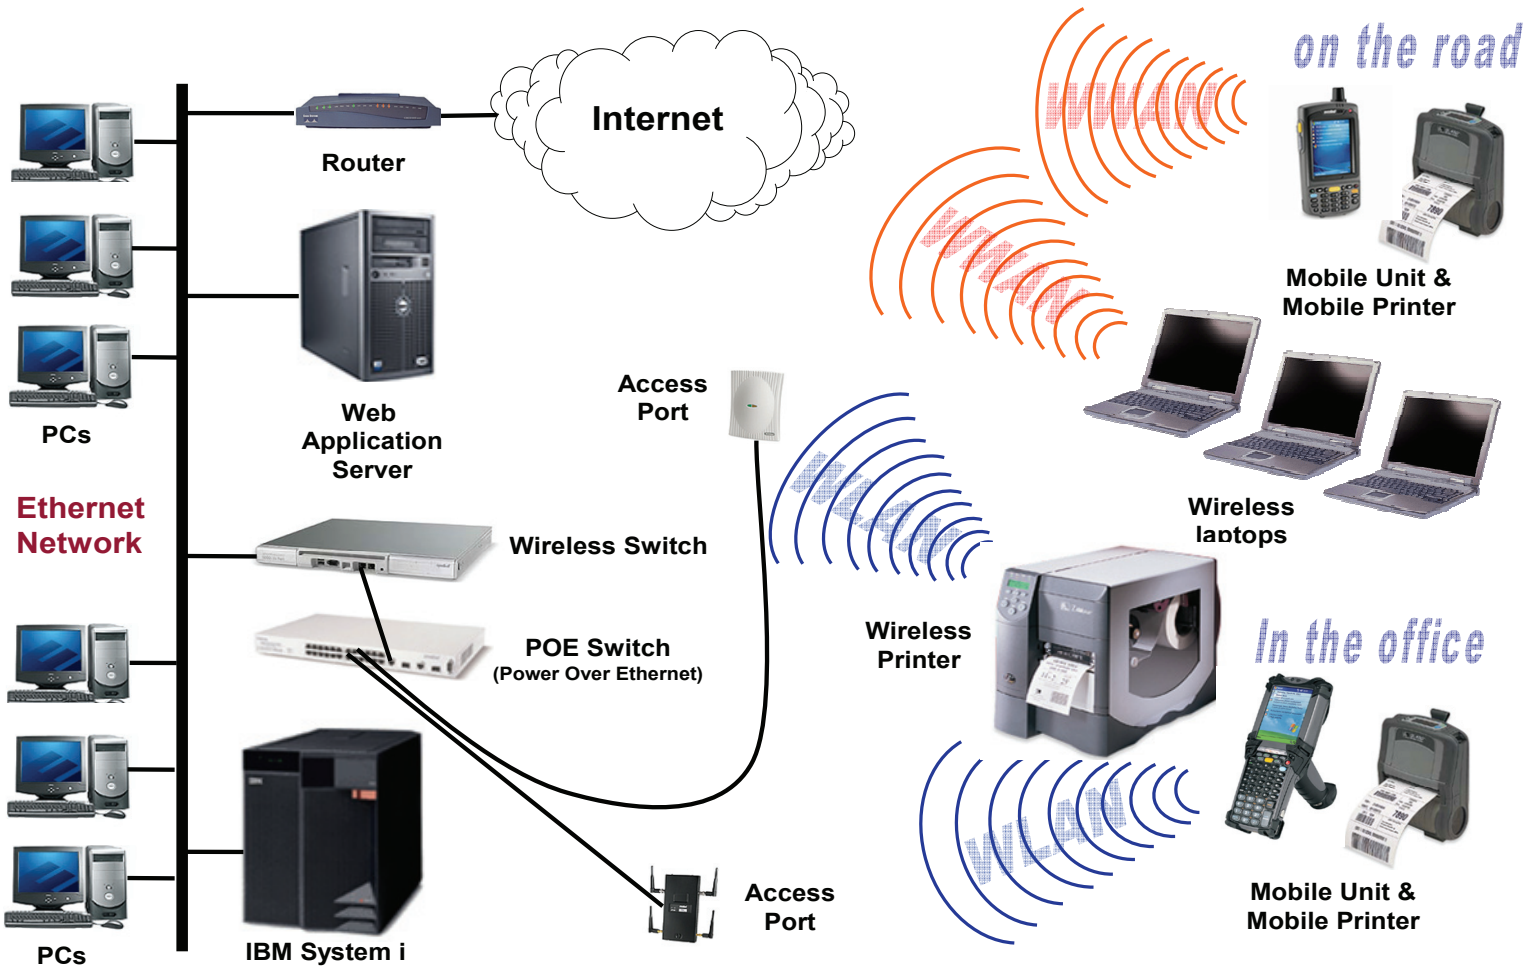

"The Quatred mobile extension of SunGard's Personnel Equipment Issues and Fire Resource Activities has tremendously improved our efficiency with issuing and maintaining our personal protective equipment in order to meet NFPA standards. Furthermore, we can add activities such as advanced inspections and cleanings and record results all with the touch of a button."

Chris Whitmire, Assistant Chief, Marietta Fire Department

The following are the minimum requirements for implementing the QUICK® Mobile Computing/Bar Coding Interfaces for SunGard public administration and public safety applications.

QUICK® Interface Overview Diagram

Web Application Server

- Microsoft® IIS 6.0
- Microsoft® .NET Framework 2.0
- IBM® iSeries Access V5R3M0 or higher (latest PTFs)
 - ◆ Only Data Access Component / .Net Data Provider

Motorola MC70 or MC9090

- QUICK® Interface For SunGard
- Microsoft® Windows Mobile 5.0
- Microsoft® .NET Compact Framework 2.0 SP2
- SQL Mobile Edition 2005

IBM System i

- V5R3M0 or higher
- SunGard® Public Admin or Public Safety Bar Coding Interface at 5.0.9.0 or higher
