

Introducing...

SunGard Public Sector's New Bar Coding Solution

Track inventory and assets in both public safety and public administration with SunGard Public Sector's new Bar Coding solution.

Integrating seamlessly with existing SunGard Public Sector applications, Bar Coding allows users to electronically track items via bar code. Mobile handheld bar code scanners provide both offline and online communication with SunGard Public Sector software. SunGard Public Sector's Bar Coding application simplifies managing inventory via bar code through a fully automated interface.

Bar Coding will be available for use with the following SunGard Public Sector applications:

- Purchasing/Inventory application
 - ◆ Issuing inventory
 - ◆ Physical inventory
- Fixed Assets
 - ◆ Physical inventory
- Asset Management II
 - ◆ Physical inventory
- Crimes
 - ◆ Evidence and equipment inventory

Targeted Availability:

- ◆ Public Safety - end of December 2007.
- ◆ Public Administration - February 2008.

See your Sales Representative for final release dates.

A SunGard Public Sector Preferred Solution Provider, Quatred, LLC provides mobile bar coding solutions that interface with SunGard Public Sector software, along with bar code design and printing integration.
